COMPLIANCE OF AMENDMENT ENVIRONMENTAL CLEARANCE MINISTRY'S LETTER**NO.: J-11011/124/2009-IA II (I), DATED 24th July, 2012****April 2021 TO September 2021**

S. NO.	CONDITIONS	COMPLIANCE STATUS
1	This is in continuation of this Ministry's letter of even no. dated 10.06.2009 and your subsequent communication dated 5.02.2012, 24.04.2012 and 23.05.2012 requesting the Ministry for amendment of environmental clearance dated 10.06.2009 due to increase in the coal requirement from 288-360 MTPD to 328-360 MTPD.	Noted.
2	It is noted that in para 4 of environmental clearance of even no. dated 10.06 2009, that fuel requirement for the boiler has been mentioned as 288-360 TPD of Imported/Indian coal. The quantity of coal as per the environmental clearance was based on the following Gross Calorific Value (GCV): i. Gross Calorific Value (GCV) of imported coal 5500kcal/kg and quantity of coal for the 12 TPH boiler = 288 TPD ii. Gross Calorific Value (GCV) of Indian Coal/ lignite = 3800 kcal/kg, Quantity of coal for the 15 TPH boiler = 360 TPD	Noted.
3	However, the GCV of actual imported coal received is 3800 kcal/kg and coal requirement is 410 TPD. Due to non-availability of Indian coal, company proposes to use lignite along with Indian coal for which the GCV is 3300 kcal/kg. The coal requirement would be 450 TPD. Since the import of coal and coal mining is closed in monsoon season, there is fluctuation in coal availability and hence, it is proposed to use Petcoke (20%) as a fuel in combination with Lime (20%) with normal 80% Imported / Indian coal / lignite (328-360 TPD) so that captive power plant can run on full capacity. The company has installed electrostatic participator to control the particulate emissions To control the SO ₂ emissions; it is proposed to use 20 % of lime mix with Petcoke.	We are not using Petcoke, only Imported coal is used as fuel for power plant.
4	The proposal was placed before the Expert Appraisal Committee-1 (Industry) in its meeting held during 29th-30th March, 2012 (p. 326/c). After detailed deliberations, the Committee recommended for amendment in the above environmental clearance to increase the requirement of	We are not using Petcoke, only Imported coal is used as fuel for power plant.

5	The Ministry accepts the recommendation of EAC -1 (Industry) for amendment in the above environmental clearance in respect of increase in the coal requirement from 288 - 360 MTPD to 328-360 MTPD (80% imported / Indian coal / lignite) and / or to use Petcoke (20% of Petcoke - 90 MTPD of pet coke and 18 MTPD of lime) as mentioned in para 4 of environmental clearance dated 10.06.2009 subject to stipulation of following additional safeguards:	We are not using Petcoke, only Imported coal is used as fuel for power plant
	i. To control the SO ₂ emissions, lime shall be used. The emissions shall be scrubbed with caustic scrubber.	Noted.

ANNEXURE – 15 Action Plan for CSR Activity

Write-up for Environment Clearance :

Action Plan for CSR Activities with allocated fund to be undertaken over next five years.

Environment Clearance File No. J-1011/624/2010-IA II(I) was granted dated 10/05/2013.

The Company was going through a bad business phase due to the following reasons:

- Volatility in average composite price of principal raw material prices i.e. PTA & MEG. Hence, such volatility of raw material prices had greatly impacted the operating margins.
- Backward integration by chip buyers / yarn manufacturer had resulted in overcapacity in chips market. However, sales from chips accounts for 55% of the total sales of the company.
- Unfavorable taxation policy of both Central & State Government has adversely affected the demand growth. For instance, the Company was not enjoying CST exemption for its domestic sales outside Gujarat in comparison to competitors situated in Silvassa-Daman area who enjoy tax holiday upto 2017 or 15 years from the financial year of commercial operations.
- Demand for Man-made fabrics had remained almost stagnant, as against the earlier growth rate of 8 to 10% prior to 2011.
- Increase in Power Cost due to steep rise in gas & coal prices made the Company at dis-advantageous position vis-à-vis its peer competitors from Silvassa-Daman area who use very low-priced power from the grid.

The expected turnaround did not happen and in 2014-15, a Joint Lenders Forum of our bankers was formed in May, 2014 to address the problems. The performance of the Company did not improve, and the Company could not continue to service its debts. Most of the lenders started declaring our Account as NPA in 2016-17 and one of our lenders, took our Company to NCLT in 2018 for Insolvency Resolution Process. We give below snapshot of our Performance

Your goodself will see that, we continued making losses since 2013-14, and our Net Worth turned negative in 2015-16. In fact, we were not able to fully service the interest of the term bank borrowings.

In these circumstances, we could manage only Rs.60 lacs of CSR since the grant of the subject EC. Having made losses year after year, there was no Company's Act requirement of carrying out any CSR, however, we still spared some funds for CSR as and when our Cash Flows permitted. All the details of such CSR have been provided in the Six Monthly EC Compliances submitted to your goodself's Office, and we are enclosing the Consolidated List once again in the enclosed file as **Annexure - 1**. We also enclose Annual Report of 2019-20 with flag showing the Negative Net Worth of -Rs.558/- crores as **Annexure - 2**.

Submit the details of time targeted action plan for CER Activity.

Our Company underwent CIRP (Corporate Insolvency Resolution Process) at NCLT during 2018 to 2020, and in an Order dated January 1 2021, the Hon'ble NCLT approved of the Resolution Plan from MCPI Private Limited, Kolkata. The NCLT Order is enclosed as **Annexure - 3**. The new Management from MCPI Private Limited, Kolkata, has taken over the reins of the Company w.e.f. February 13, 2021 when the new Board of Directors was formed.

The buyer has bought the Company with sufficient funds, and has plans to infuse more investment in expansion of the Company's manufacturing facilities. This is because, with the textile industry having its massive ups and downs, the Company with its present capacity cannot be operationally viable. The orientation of the manufacturing operations have to turn towards more Value Added Products in order to survive and strive in this topsy turvy market. With Covid-19 affecting production and demand all over the world, it will be a while before the Company's operations start generating profits. However, we being a socially conscious Company, we shall keep CER in our mind while we tread the path forward towards stabilization and later profitability.
